

Carbon Reduction Plan

Our Commitment to Net Zero

COMMITMENT TO ACHIEVING NET ZERO

Ever Brite Cleaning Services is committed to achieving Net Zero emissions by 2040.

Publication date: 20/09/2023

BASELINE EMISSIONS FOOTPRINT

Baseline Year: 2022 (1/1/2022 – 31/12/2022)

The Carbon Reduction Plan has been completed in compliance with PPN 06/21. Our Carbon Emissions in 2022 were measured in line with GHG Protocol and include the greenhouse gases stated in the Kyoto Protocol.

Baseline year emissions: 2022

EMISSIONS	TOTAL (tCO ₂ e)	
Scope 1	162.34	
Scope 2	5.74	
Scope 3	1.32	
Included Sources	Business travel	0.00
	Employee commuting	1.31
	Upstream transportation and distribution	0.01
	Downstream transportation and distribution	0.02
	Waste generated in operations	0.00
Total Emissions	169.39	

CURRENT EMISSIONS REPORTING

Reporting Year: 2022 (1/1/2022 – 31/12/2022)

The Carbon Reduction Plan has been completed in compliance with PPN 06/21. Our Carbon Emissions in 2022 were measured in line with GHG Protocol and include the greenhouse gases stated in the Kyoto Protocol.

Baseline year emissions: 2022

EMISSIONS	TOTAL (tCO2e)	
Scope 1	162.34	
Scope 2	5.74	
Scope 3	1.32	
Included Sources	Business travel	0.00
	Employee commuting	1.31
	Upstream transportation and distribution	0.01
	Downstream transportation and distribution	0.02
	Waste generated in operations	0.00
Total Emissions	169.39	

REPORTING PERIOD

Ever Brite Cleaning Services will publish a Carbon Reduction Plan on a yearly basis detailing emissions released from UK Operations from 1st January to 31st December.

BASELINE YEAR & CURRENT REPORTING YEAR

Due to 2022 being the first year we have measured our CO₂e emissions, the report for the Baseline Year and Current Reporting year contains the same figures. Due to this, the explanations below apply to both sets of data:

SCOPE 1

Scope 1 is reported as 162.34 tCO₂e in 2022 as we have tracked the mileage travelled by our fleet. **Ever Brite Cleaning Services** do not have boilers, on-site manufacturing, or f-gases to report emissions on.

SCOPE 2

Within Scope 2, we have measured the emissions released from working from home and the consumption of purchased gas and electricity in office. With all of **Ever Brite Cleaning Services** employees making the most of hybrid working, we have calculated 2 out of 5 days as spent working from home and the other X from the office. Heating, lighting and computer consumption have all been taken into account to calculate emissions released due to working from home.

SCOPE 3

BUSINESS TRAVEL

The Business Travel Subset in Scope 3 is reported as 0 tCO₂e in the [Baseline Year /Reporting Year] due to **Ever Brite Cleaning Services** not travelling by Air, Rail, Bus, travel in rental cars or travel in employee-owned vehicles other than the commute to and from work. All employee travel is therefore reported in the Employee Commuting Subset of Scope 3.

EMPLOYEE COMMUTING

The emissions resulting from employee commuting have been calculated at 1.31 tCO₂e, considering factors such as the distance travelled, mode of transportation, and average fuel consumption. This calculation accounts for the total commuting emissions generated by our employees and the corresponding greenhouse gas emissions associated with their transportation choices.

UPSTREAM AND DOWNSTREAM TRANSPORTATION

The emissions resulting from upstream and downstream transportation have been assessed and quantified at 0.03 tCO₂e. This calculation considers the transportation activities involved in sourcing materials and delivering finished products, taking into account factors such as distance travelled, modes of transportation, and fuel consumption. It accounts for the greenhouse gas emissions generated during both the upstream and downstream transportation processes, contributing to a comprehensive understanding of our carbon footprint.

WASTE GENERATE IN OPERATIONS

As of now, **Ever Brite Cleaning Services** does not have a waste removal provider. Therefore, we do not have access to specific data regarding CO₂e emissions related to waste disposal.

EMISSIONS REDUCTION TARGETS

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. We project that carbon emissions will decrease over the next five years to 59.29 tCO₂e by 2028. This is a reduction of 65%.

CARBON REDUCTION PROJECTS

COMPLETED CARBON REDUCTION INITIATIVES

The following environmental management measures and projects have been completed or implemented since the 2022 baseline:

- We have implemented Hybrid Working to reduce emissions from employee commuting
- We have LED sensor lights our office to prevent the waste of electricity
- We are moving to concentrate chemicals to reduce plastic usage by 95%
- We are upgrading our fleet to electric vehicles to reduce emissions
- We are moving to a paperless office system

DECLARATION AND SIGN OFF

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors.

Signed on behalf of the Supplier:
